

ThermoTek Delivers Superior Engineering and Design With a Full Line of Heating and Ventilation Products.

Thermotek, with 50 years of experience, can solve your heating and ventilation needs. With our easy-to-use sizing and selection software, we can answer your needs and ensure a superior design

Industry Experience

- Company-wide, ThermoTek has been manufacturing ventilation and heating equipment since 1965
- ThermoTek has since grown into the leading manufacturer of MUA systems, manufacturing over 9000 gas fired heaters per year company-wide
- Industry leader in direct fired heating equipment
- Wide breadth of products including exhaust fans, kitchen ventilation, industrial direct fired, and modular makeup air systems

Streamlined Manufacturing

- Six strategically located manufacturing plants - PA, IA, CA, OK, FL, NC
- Utilizes advanced robotics and automation technology to increase efficiency while guaranteeing maximum quality
- Design, construction, and assembly techniques support efficient production of electric, indirect, direct fired, hot water, and steam heating solutions
- Shortest lead times in the industry: 1-2 weeks on modular MUA products
- Competitive pricing on full line of products ranging from commercial to industrial products

Quality and Support

- Highly trained work force maintains production levels without sacrificing quality
- Equipment built with off the shelf components from reputable companies such as Honeywell, Midco, Maxitrol, Twin City Fan
- Prior to shipment each piece of equipment undergoes a complete and stringent series of tests to ensure that the unit operates as designed
- Technical sales team
- Instant to-scale AutoCAD and PDF drawings with every bid
- Local service technicians
- Service videos
